

WAN NA AUNG

Software engineer

+66-818-650-726 dev.jinn221@gmail.com <https://wannaaung.dev> Thailand <https://github.com/404j361>

PROFILE

Full-stack developer building modern web and mobile products across analytics, AI, education, commerce, rewards, operations, and developer-learning platforms. Experienced in React, Next.js, NestJS, Go, Laravel, PostgreSQL, CI/CD, server maintenance, and security-minded delivery.

EDUCATION

Bachelor of Business Administration
Kamphaeng Phet Rajabhat University

Bachelor of Computer Science
University of the People

SKILLS

HTML/CSS/JS	
ReactJs	
NodeJs	
RemixJs	
SvelteKit	
NestJs	
PHP/Laravel	
Go/Go-chi	
React Native	
Git & GitHub	
DevOPS	

PROFESSIONAL EXPERIENCE

Present
–
2026

Myanmar Zarla Distribution

Full-stack developer

- Build and maintain web applications, internal tools, and secure digital systems for distribution operations, ecommerce workflows, and business teams.
- Deliver website and app development, internal business systems, and security-minded operational features.

2026
–
2025

Sabahna Technology Co. Ltd

Full-stack developer

- Build social analytics products across Facebook, Instagram, and TikTok with fast dashboards, clean data views, and maintainable frontend architecture.
- Develop React and Next.js surfaces, RTK Query data flows, and frontend architecture patterns while mentoring contributors.

2025
–
2024

B8 ICT Solution

Full-stack developer

- Build social analytics products across Facebook, Instagram, and TikTok with fast dashboards, clean data views, and maintainable frontend architecture.
- Develop React and Next.js surfaces, RTK Query data flows, and frontend architecture patterns while mentoring contributors.

2024
–
2022

Prodigy Team Malaysia

Full-stack developer

- Led full-stack delivery across co-operator projects in Asia, spanning ecommerce, dashboards, backend services, server maintenance, and security hardening.
- Worked with Go, SQLC, Laravel, PostgreSQL, and security-focused operations.

RECENT PROJECTS

Social Metrica

Social Metrica is a cross-platform analytics dashboard. Tracks Facebook, Instagram, and TikTok. Built for data analyzing, campaign monitoring and reporting.

Responsibilities

- Frontend architecture in React + TypeScript
- Built scalable NestJS APIs
- Integrated Facebook and TikTok data pipelines
- Ensure data accuracy and performance for large datasets

View Website

- https://web.socialmetrica.com/sign_up

Tech Stack

- Frontend: React, TypeScript, Vite, Redux Toolkit, RTK Query, Ant Design, ECharts
- Backend: NestJS, Fastify, MongoDB/Mongoose, REST APIs, Swagger
- Services: gRPC, Protobuf/ts-proto, MQTT, scheduled crawler jobs
- Integrations: Facebook Graph API, TikTok, Stripe, SendGrid, AWS S3, Firebase/GA4
- DevOps: Docker, Kubernetes, PM2, Nginx, CI/CD, Vitest, Jest, k6

RECENT PROJECTS

Lifi Ai

A cross-platform AI assistant app that connects users to interactive, AI-powered video/voice chat experiences.

Responsibilities

- Built the Expo mobile app for AI language practice, onboarding, character selection, subscriptions, and progress flows
- Integrated real-time voice/video AI sessions using Pipecat and Daily transport
- Developed Supabase-powered auth, profile, premium, and admin reporting workflows
- Created SvelteKit admin dashboards for users, subscriptions, sales reports, and session analytics

- [App Store](#)

Tech Stack

- Mobile: Expo, React Native, TypeScript, Expo Router, NativeWind, Gluestack UI
- AI/Voice: Pipecat AI, Daily WebRTC, captions, real-time speech events
- Backend/Data: NestJs, AsyncStorage, SecureStore
- Payments/Auth: RevenueCat, Apple Auth, Google Sign-In, OTP flows
- Web/Admin: SvelteKit, Vite, Next.js, Tailwind CSS, Chart.js, Framer Motion

RECENT PROJECTS

Bahozay

A comprehensive B2B & B2R wholesale commerce platform connecting brands, distributors, and retail outlets across Myanmar with web and mobile experiences.

Responsibilities

- Designed and implemented NestJS REST APIs
- Handled authentication, product catalog, cart & order workflows
- Optimized performance and backend scalability
- Managed database design and queries

Tech Stack

- Backend: NestJS, REST APIs, Swagger, Scalar
- Services: gRPC, Protobuf/ts-proto, MQTT, scheduled jobs
- Integrations: Facebook Graph API, TikTok, Stripe, SendGrid, AWS S3, Firebase/GA4
- DevOps: Docker, Kubernetes, PM2, Nginx, CI/CD, Vitest, Jest, k6

A LITTLE ABOUT ME

Hi, I'm Wan Na Aung, a full-stack developer who enjoys building things from ideas into real, usable products. I work across web, mobile, backend systems, and DevOps, and I'm always interested in learning new technologies and finding better ways to solve problems. For me, software development is not just about writing code—it's about understanding a problem, building a solution, and continuously improving it.

Recently, I've been working on three projects that I'm particularly proud of. Social Metrica is a social media analytics platform that brings together data from Facebook, Instagram, and TikTok to help users analyze and monitor their performance. Lifi AI is an AI-powered language practice application where I worked on the mobile app, real-time voice/video experiences, authentication, subscriptions, and admin systems. Bahozay is a B2B and B2R wholesale commerce platform connecting brands, distributors, and retail outlets across Myanmar, where I focused heavily on backend development, APIs, database design, and system scalability.

These projects have given me the opportunity to work with different technologies, solve different kinds of problems, and continue growing as a developer. There's always something new to build, and I'm excited for what comes next.
